Senior Care Options ◇

Notes:

+ Disclaimer and audit information is located at the end of this document.

◇ The guidelines included in this Plan policy are applicable to members enrolled in Senior Care Options only if there are no criteria established for the specified service in Centers for Medicare & Medicaid Services (CMS) national coverage determination (NCD) or local coverage determination (LCD) on the date of the prior authorization request. Review the member's product-specific benefit documents at www.SeniorsGetMore.org to determine coverage guidelines for Senior Care Options.

Policy Summary

The Plan considers outpatient and medically-supervised, phase II cardiac rehabilitation programs to be **medically necessary when applicable InterQual® criteria are met for an adult member**. Phase II refers to outpatient, medically-supervised programs that are typically initiated within a few weeks after hospital discharge and provide appropriate electrocardiographic (ECG) monitoring and medically-supervised exercise.

Cardiac Rehabilitation, Outpatient

⁺ Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

Prior authorization may or may not be required for cardiac rehabilitation based on the member's age and medical record documentation of the member's condition, indication(s) for treatment (including the member's primary diagnosis code), the applicable procedure code used to accurately document and bill for cardiac rehabilitation, and the location of care, as specified below in items 1 through 5:

1. Outpatient and Medically-Supervised Phase II Cardiac Rehabilitation:

- a. Prior authorization requests for outpatient and medically-supervised, phase II cardiac rehabilitation for **pediatric members** (under the age of 18 on the date of service) require Plan Medical Director review and approval until InterQual® criteria are available for the Plan's pediatric members.
- b. Outpatient and medically-supervised, phase II cardiac rehabilitation for **adult members** (age 18 or older on the date of service) **REQUIRES** Plan prior authorization for some medical conditions according to applicable **InterQual® criteria**; conditions that require prior authorization include any indication(s) for treatment **NOT** specified in the Applicable Coding section as a waived primary diagnosis code.
- c. Outpatient and medically-supervised, phase II cardiac rehabilitation for **adult members** (age 18 or older on the date of service) to treat other medical conditions do **NOT** require Plan prior authorization for outpatient, phase II cardiac rehabilitation **ONLY** when Plan billing guidelines specified in the Applicable Coding section are met and medical record documentation supports that **ALL** of the following criteria are met, as specified in items (1) through (3):
 - (1) InterQual® criteria are met for outpatient, phase II cardiac rehabilitation for an adult member age 18 or older on the date of service, as documented in the member's medical record; Δ **AND**

Δ Note: Applicable InterQual® criteria must still be met when Plan prior authorization is waived for outpatient and medically-supervised, phase II cardiac rehabilitation services provided to an adult member (age 18 or older on the date of service). Documentation in the member's medical record must include clinical information supporting that applicable InterQual® criteria are met, that the member's diagnosis is consistent with a diagnosis code waived for Plan prior authorization, and that outpatient and medically-supervised, phase II cardiac rehabilitation services was provided to the Plan member. To waive the prior authorization requirement, outpatient and medically-supervised, phase II cardiac rehabilitation services must also be billed with an applicable covered and medically necessary CPT code specified in the Applicable Coding section of this policy (and excludes the experimental and investigational HCPCS code listed in

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

the Applicable Coding section). The waived, primary diagnosis code must be accurately documented on the claim form with the covered procedure code.

- (2) Outpatient, phase II cardiac rehabilitation is provided to an adult member who has a primary diagnosis for which the Plan has waived a prior authorization requirement for this service. The waived, primary diagnosis code must be listed on the claim form with an accurate, covered procedure code for outpatient, phase II cardiac rehabilitation, as stated in the Applicable Coding section of this policy. In addition, the member must have at least ONE (1) of the following current medical conditions or has had at least ONE (1) of the following surgical procedures specified below in items (a) through (h):
 - (a) Cardiac surgery; OR
 - (b) Compensated heart failure; OR
 - (c) Coronary artery bypass graft surgery; OR
 - (d) Current stable angina pectoris; OR
 - (e) Heart or heart/lung transplantation; OR
 - (f) Myocardial infarction (MI); OR
 - (g) Percutaneous coronary intervention or angioplasty (PCI/PTCA) with or without coronary stenting; OR
 - (h) Valve disorders, including repair or replacement surgery; AND
- (3) The medically necessary treatment is consistent with an applicable procedure code for outpatient, phase II cardiac rehabilitation, as specified in the Applicable Coding section of this policy.

2. Intensive Cardiac Rehabilitation (ICR):

Plan Medical Director review is required for requests for ICR for a Plan member. Prior authorization requests for ICR will be evaluated by a Plan Medical Director using the Plan's *Medically Necessary* medical policy, policy number OCA 3.14.

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

3. **Phase I Inpatient Cardiac Rehabilitation:**

An additional Plan prior authorization is NOT required for cardiac rehabilitation provided in an inpatient setting (phase I) when the inpatient admission has already been authorized by the Plan.

4. **Phase III and Phase IV Cardiac Rehabilitation Programs:**

Phase III and phase IV cardiac rehabilitation programs are considered maintenance programs and therefore are NOT considered medically necessary by the Plan after the completion of outpatient and medically-supervised, phase II cardiac rehabilitation. Plan Medical Director review is required for all Plan members.

5. **Cardiac Rehabilitation Programs NOT Medically Supervised by a Physician:**

A cardiac rehabilitation program must be medically supervised by a physician (rather than supervised by a non-physician provider) to be considered medically necessary. Prior authorization requests for a cardiac rehabilitation program that is not medically supervised by a physician will be evaluated by a Plan Medical Director for all Plan members using the Plan's *Experimental and Investigational Treatment* medical policy, policy number OCA 3.12. The applicable code for this service is NOT payable for any Plan product.

It will be determined during the Plan's prior authorization process if the service is considered experimental and investigational for the requested use or if the service is considered medically necessary. The Plan's *Medically Necessary* medical policy, policy number OCA 3.14, includes the product-specific definitions of medically necessary treatment and the Plan's *Experimental and Investigational Treatment* medical policy, policy number OCA 3.12, specifies the product-specific definitions of experimental or investigational treatment. Review the member's applicable benefit documents for coverage guidelines, benefit limits and exclusions, and requirements related to cardiac rehabilitation services available at www.bmchp.org for a BMC HealthNet Plan member, at www.SeniorsGetMore.org for a Senior Care Options member, and at www.wellsense.org for a Well Sense Health Plan member.

Description of Item or Service

Cardiac Rehabilitation, Outpatient: Review the applicable InterQual® criteria and description of item or service. Review the Policy Summary and the Applicable Coding sections of this policy.

Intensive Cardiac Rehabilitation (ICR): According to the Centers for Medicare & Medicaid Services (CMS), "intensive cardiac rehabilitation (ICR) refers to a physician-supervised program that furnishes cardiac rehabilitation services more frequently and often in a more rigorous manner. As required by §1861(eee)(4)(A) of the Social Security Act (the Act), an ICR program must show, in

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

peer-reviewed published research, that it accomplished one (1) or more of the following for its patients: (1) positively affected the progression of coronary heart disease; (2) reduced the need for coronary bypass surgery; and (3) reduced the need for percutaneous coronary interventions. The ICR program must also demonstrate through peer-reviewed published research that it accomplished a statistically significant reduction in five (5) or more of the following measures for patients from their levels before cardiac rehabilitation services to after cardiac rehabilitation services: (1) low density lipoprotein; (2) triglycerides; (3) body mass index; (4) systolic blood pressure; (5) diastolic blood pressure; and (6) the need for cholesterol, blood pressure, and diabetes medications. Individual ICR programs must be approved through the national coverage determination process to ensure that they demonstrate these accomplishments.” Program criteria are outlined at: http://www.ssa.gov/OP_Home/ssact/title18/1861.htm. The list of CMS approved facilities are listed at: <http://www.cms.gov/Medicare/Medicare-General-Information/MedicareApprovedFacilitie/>

Phases of Cardiac Rehabilitation: There are four (4) phases of cardiac rehabilitation, as specified below in items 1 through 4:

1. Phase I: The inpatient program that typically begins as soon as the patient is medically stable following a cardiac event or procedure that involves a progressive exercise program, risk factor modification, and education.
2. Phase II: A hospital-based, outpatient program that is usually initiated within a few weeks following hospital discharge that consists of ECG monitoring, supervised exercise, risk factor modification, and education. Phase II cardiac rehabilitation, as described by the U.S. Public Health Service, is a comprehensive, long-term program involving medical evaluation, prescribed exercise, cardiac risk factor modification, education, and counseling. These programs are designed to limit the physiologic and psychological effects of cardiac illness, reduce the risk for sudden death or re-infarction, control cardiac symptoms, stabilize or reverse the atherosclerotic process, and enhance the psychosocial and vocational status of selected patients. The frequency and duration of the program generally does not exceed 36 sessions, occurring 2-3 times per week for 12-18 weeks.
3. Phase III: A community or home-based, outpatient maintenance program that continues after discharge from phase II that provides a long-term program of unsupervised exercise and risk factor modification.
4. Phase IV: A home-based, life-long outpatient maintenance program that consists of routine exercise and risk factor modification.

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

Medical Policy Statement

The Plan considers outpatient and medically-supervised, phase II cardiac rehabilitation programs to be medically necessary when applicable InterQual® criteria are met for an adult member (age 18 or older on the date of service).

Limitations

1. Any of the following services requires Plan Medical Director review and approval, as specified below in items a through d:
 - a. Cardiac rehabilitation for a pediatric member (under the age of 18 on the date of service) until InterQual® criteria are available for the Plan's pediatric members.
 - b. Intensive cardiac rehabilitation (ICR) for a Plan member. Prior authorization requests for ICR will be evaluated by a Plan Medical Director using the Plan's *Medically Necessary* medical policy, policy number OCA 3.14.
 - c. Phase III and phase IV cardiac rehabilitation programs for all Plan members because these programs are considered maintenance programs and therefore are NOT considered medically necessary by the Plan after the completion of outpatient and medically-supervised, phase II cardiac rehabilitation.
 - d. Cardiac rehabilitation program that is NOT medically supervised by a physician. Prior authorization requests for a cardiac rehabilitation program that is not medically supervised by a physician will be evaluated by a Plan Medical Director for all Plan members using the Plan's *Experimental and Investigational Treatment* medical policy, policy number OCA 3.12.
2. The use of a mobile medical application (software that can be executed on a mobile platform or web-based) for cardiac rehabilitation is considered experimental and investigational or NOT medically necessary due to insufficient published evidence to assess the safety and/or impact on health outcomes related to cardiac rehabilitation.

Applicable Coding

The Plan uses and adopts up-to-date Current Procedural Terminology (CPT) codes from the American Medical Association (AMA), International Statistical Classification of Diseases and Related Health Problems, 10th revision (ICD-10) diagnosis codes developed by the World Health Organization and adapted in the United States by the National Center for Health Statistics (NCHS) of the Centers for Disease Control under the U.S. Department of Health and Human Services, and the Health Care Common Procedure Coding System (HCPCS) established and maintained by the Centers for Medicare & Medicaid Services (CMS). Since the AMA, NCHS, and CMS may update

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

codes more frequently or at different intervals than Plan policy updates, the list of applicable codes included in this Plan policy is for informational purposes only, may not be all inclusive, and is subject to change without prior notification. Whether a code is listed in the Applicable Coding section of this Plan policy does not constitute or imply member coverage or provider reimbursement. Providers are responsible for reporting all services using the most up-to-date industry-standard procedure and diagnosis codes as published by the AMA, NCHS, and CMS at the time of the service.

Providers are responsible for obtaining prior authorization for the services specified in the Medical Policy Statement section and Limitation section of this Plan policy, even if an applicable code appropriately describing the service that is the subject of this Plan policy is not included in the Applicable Coding section of this Plan policy. Coverage for services is subject to benefit eligibility under the member’s benefit plan. Refer to the member’s benefits document in effect at the time of the service to determine coverage or non-coverage as it applies to an individual member. See Plan reimbursement policies for Plan billing guidelines. See the Plan’s applicable reimbursement policies for Plan billing guidelines available at www.bmchp.org for BMC HealthNet Plan members and at www.wellsens.org for Well Sense Health Plan members.

ICD-10 Diagnosis Codes Δ	Description: Prior authorization is NOT required for ANY of the following waived, primary diagnosis codes for outpatient, phase II cardiac rehabilitation when the service is billed with a covered CPT code listed below. Δ
I05.0-I08.9	Rheumatic valve diseases
I09.1	Rheumatic diseases of endocardium, valve unspecified
I11.0	Hypertensive heart disease with heart failure Plan note: Excludes heart failure with decompensation, as specified in InterQual® criteria.
I13.0	Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease
I13.2	Hypertensive heart and chronic kidney disease with heart failure and stage 5 chronic kidney disease, or end stage renal disease Plan note: Excludes heart failure with decompensation, as specified in InterQual® criteria.
I20.1	Angina pectoris with documented spasm Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I20.8	Other forms of angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

I20.9	Angina pectoris, unspecified Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I21.01-I21.4	ST elevation (STEMI) and non-ST elevation (NSTEMI) myocardial infarction
I22.0-I22.9	Subsequent ST elevation (STEMI) and non-ST elevation (NSTEMI) myocardial infarction
I23.7	Postinfarction angina Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I24.0-I24.9	Other acute ischemic heart disease
I25.10	Atherosclerotic heart disease of native coronary artery
I25.111	Atherosclerotic heart disease of native coronary artery with angina pectoris with documented spasm Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I25.118	Atherosclerotic heart disease of native coronary artery with other forms of angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I25.119	Atherosclerotic heart disease of native coronary artery with unspecified angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I25.2	Old myocardial infarction
I25.3	Aneurysm of heart
I25.41-I25.42	Coronary artery aneurysm or dissection
I25.6	Silent myocardial ischemia
I25.701	Atherosclerosis with coronary artery bypass graft(s), unspecified, with angina pectoris with documented spasm Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I25.708	Atherosclerosis with coronary artery bypass graft(s), unspecified, with other forms of angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I25.709	Atherosclerosis with coronary artery bypass graft(s), unspecified, with angina pectoris with unspecified angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

125.711	Atherosclerosis of autologous vein coronary artery bypass graft(s) with angina pectoris with documented spasm Plan note: Excludes unstable angina, as specified in InterQual® criteria.
125.718	Atherosclerosis of autologous vein coronary artery bypass graft(s) with angina pectoris with other forms of angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
125.719	Atherosclerosis of autologous vein coronary artery bypass graft(s) with angina pectoris with unspecified angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
125.721	Atherosclerosis of autologous artery coronary artery bypass graft(s) with angina pectoris with documented spasm
125.728	Atherosclerosis of autologous artery coronary artery bypass graft(s) with angina pectoris with other forms of angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
125.729	Atherosclerosis of autologous artery coronary artery bypass graft(s) with angina pectoris with unspecified angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
125.731	Atherosclerosis of nonautologous biological coronary artery bypass graft(s) with angina pectoris with documented spasm Plan note: Excludes unstable angina, as specified in InterQual® criteria.
125.738	Atherosclerosis of nonautologous biological coronary artery bypass graft(s) with angina pectoris with other forms of angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
125.739	Atherosclerosis of nonautologous biological coronary artery bypass graft(s) with angina pectoris with unspecified angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
125.751	Atherosclerosis of native coronary artery of transplanted heart with angina pectoris with documented spasm Plan note: Excludes unstable angina, as specified in InterQual® criteria.

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

I25.758	Atherosclerosis of native coronary artery of transplanted heart with angina pectoris with other forms of angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I25.759	Atherosclerosis of native coronary artery of transplanted heart with angina pectoris with unspecified angina pectoris Plan note: Excludes unstable angina, as specified in InterQual® criteria.
I25.81-I25.89	Other forms of chronic ischemic heart disease
I25.9	Chronic ischemic heart disease, unspecified
I34.0-I37.9	Nonrheumatic valve disorders
I46.2-I46.9	Cardiac arrest
I50.1-I50.9	Heart failure Plan note: Excludes heart failure with decompensation, as specified in InterQual® criteria.
I97.0	Postcardiotomy syndrome
I97.110	Postprocedural cardiac insufficiency following cardiac surgery
I97.120	Postprocedural cardiac arrest following cardiac surgery
I97.130	Postprocedural heart failure following cardiac surgery
Z94.1	Heart transplant status
Z94.3	Heart and lungs transplant status
Z95.0-Z95.5	Presence of cardiac implants and grafts
Z95.811- Z95.818	Presence of other cardiac implants and grafts
Z98.61	Coronary angioplasty status

CPT Codes Δ	Description: Codes covered for outpatient and medically-supervised, phase II cardiac rehabilitation services billed no more than one (1) unit per day when medically necessary and applicable InterQual® criteria are met, as documented in the member's medical record. <ul style="list-style-type: none"> • Prior authorization is NOT required for outpatient and medically-supervised, phase II cardiac rehabilitation services when the service is billed with one of these CPT codes and a waived, primary diagnosis code specified above. Δ • All other primary diagnosis codes REQUIRE Plan prior authorization and services must meet applicable InterQual® criteria, as documented in the member's medical record.
93797	Physician or other qualified health care professional services for outpatient cardiac rehabilitation; without continuous ECG monitoring (per session)
93798	Physician or other qualified health care professional services for outpatient cardiac rehabilitation; with continuous ECG monitoring (per session)

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. The Plan operates in Massachusetts under the trade name Boston Medical Center HealthNet Plan and in other states under the trade name Well Sense Health Plan.

Δ Note: Applicable InterQual® criteria must still be met when Plan prior authorization is waived for outpatient and medically-supervised, phase II cardiac rehabilitation services provided to an adult member (age 18 or older on the date of service). Documentation in the member’s medical record must include clinical information supporting that applicable InterQual® criteria are met, that the member’s diagnosis is consistent with a diagnosis code waived for Plan prior authorization, and that outpatient and medically-supervised, phase II cardiac rehabilitation services was provided to the Plan member. To waive the prior authorization requirement, outpatient and medically-supervised, phase II cardiac rehabilitation services must also be billed with an applicable covered and medically necessary CPT code specified above (and excludes the experimental and investigational HCPCS code listed above). The waived, primary diagnosis code must be accurately documented on the claim form with the covered procedure code.

HCPCS Codes	Description: Codes covered for CMS-certified intensive cardiac rehabilitation (ICR) programs. Prior authorization with Plan Medical Director review is required for ALL diagnosis codes for ICR services.
G0422	<p>Intensive cardiac rehabilitation; with or without continuous ECG monitoring with exercise, per session</p> <p>Plan note: Plan Medical Director review is required for ICR. Prior authorization requests will be evaluated using the Plan’s <i>Medically Necessary</i> medical policy, policy number OCA 3.14.</p>
G0423	<p>Intensive cardiac rehabilitation; with or without continuous ECG monitoring; without exercise, per session</p> <p>Plan note: Plan Medical Director review is required for ICR. Prior authorization requests will be evaluated using the Plan’s <i>Medically Necessary</i> medical policy, policy number OCA 3.14.</p>

Clinical Background Information

At the time of the Plan’s most recent policy review, the Centers for Medicare & Medicaid Services (CMS) allows coverage for cardiac rehabilitation services for beneficiaries who have experienced one (1) or more of the following: Acute myocardial infarction within the preceding 12 months; coronary artery bypasses surgery; current stable angina pectoris; heart valve repair or replacement; percutaneous transluminal coronary angioplasty (PTCA) or coronary stenting; a heart or heart-lung transplant; and/or stable, chronic heart failure defined as patients with left ventricular ejection fraction of 35% or less and New York Heart Association class II to IV symptoms despite being on optimal heart failure therapy for at least 6 weeks, with stable patients defined as patients who have not had recent (≤6 weeks) or planned (≤6 months) major cardiovascular hospitalizations or procedures. See the following CMS applicable documents: National Coverage Determination (NCD) for Cardiac Rehabilitation Programs (20.10), NCD for Cardiac Rehabilitation

Cardiac Rehabilitation, Outpatient

* Plan refers to Boston Medical Center Health Plan, Inc. and its affiliates and subsidiaries offering health coverage plans to enrolled members. Policy Revisions History

	applicable code list updated. Deleted 'Phase II' from the policy title.		
12/01/12	Revised Summary section to clarify that phase II cardiac rehabilitation is conducted in the outpatient setting.	Version 10	12/19/12: MPCTAC 01/31/13: QIC
12/01/13	Review for effective date 02/01/14. Updated Summary, References, and Clinical Background Information sections. Added Plan note to the table in Applicable Coding section without revising applicable code list. Added definition (with reference) for Exercise Workload. Revised text in Medical Policy Statement section without changing criteria.	02/01/14 Version 11	12/18/13: MPCTAC 01/22/14: QIC
01/30/14	Off cycle review for effective date 04/01/14. Added ICD10 diagnosis code equivalents of existing ICD9 diagnosis codes.	04/01/14 Version 12	01/27/14: MPCTAC 01/30/14: QIC
07/01/14	Review for effective date 08/01/14. Updated Summary section. Revised language in Applicable Coding section without changing applicable code list. Added Plan note to the codes the Plan considers experimental and investigational, CPT code 93797 and HCPCS code S9472. Clarified that the diagnosis codes included in the policy apply to covered services (and not those services listed as experimental and investigational) when Plan criteria are met.	08/01/14 Version 13	07/21/14: MPCTAC (electronic vote) 07/24/14: QIC (electronic vote)
12/01/14 and 01/01/15	Review for effective date 05/01/15. Revised criteria in the Medical Policy Statement section and Limitations section. Updated Summary, Description of Item or Service, and References sections. Updated language in the Applicable Coding section and added HCPCS codes G0422 and G0423 as applicable codes for intensive cardiac rehabilitation.	05/01/15 Version 14	12/24/14: MPCTAC (electronic vote) 01/21/15: MPCTAC 02/14/15: QIC

Disclaimer Information:+

Medical Policies are the Plan's guidelines for determining the medical necessity of certain services or supplies for purposes of determining coverage. These Policies may also describe when a service or supply is considered experimental or investigational, or cosmetic. In making coverage decisions, the Plan uses these guidelines and other Plan Policies, as well as the Member's benefit document, and when appropriate, coordinates with the Member's health care Providers to consider the individual Member's health care needs.

Plan Policies are developed in accordance with applicable state and federal laws and regulations, and accrediting organization standards (including NCQA). Medical Policies are also developed, as appropriate, with consideration of the medical necessity definitions in various Plan products, review of current literature, consultation with practicing Providers in the Plan's service area who are medical experts in the particular field, and adherence to FDA and other government agency policies. Applicable state or federal mandates, as well as the Member's benefit document, take precedence over these guidelines. Policies are reviewed and updated on an annual basis, or more frequently as needed. Treating providers are solely responsible for the medical advice and treatment of Members.

The use of this Policy is neither a guarantee of payment nor a final prediction of how a specific claim(s) will be adjudicated. Reimbursement is based on many factors, including member eligibility and benefits on the date of service; medical necessity; utilization management guidelines (when applicable); coordination of benefits; adherence with applicable Plan policies and procedures; clinical coding criteria; claim editing logic; and the applicable Plan – Provider agreement.
