

EXCEPTIONAL CARE. WITHOUT EXCEPTION.

Pediatric Primary Care Services at Boston Medical Center

Welcome to the Pediatric Practice at Boston Medical Center. We are dedicated to your children, adolescents and young adults! Our team's philosophy of care and respect ensure that we deliver high quality care to patients and families in urban environments in the most supportive, positive way possible. We are committed to keeping patients healthy by promoting safety and preventative medicine, and by delivering prompt, efficient care for illnesses and injuries.

Our focus is caring for all children and their families from birth to age 22, providing them with preventative care that will keep them healthy, care during an illness, and care that helps them grow. We treat everything from basic colds to medical emergencies. The primary care services we provide include regular well child visits, immunizations, sports physical exams, school physical exams, hearing and vision screening among others.

We take pride in providing:

- Extended hours, including evening and weekend appointments
- Ability to speak with an on-call nurse 24/7
- Sick line for same-day visits
- State-of-the-art pediatric primary care and specialty services
- Full-time medical interpreters - more than 30 languages on site, 24/7
- bWell Center, providing enriching activities and health and community resources
- Health Leads group, helping patients and families navigate access to basic resources like food, heat, and other commodities needed to be healthy
- Reading books for each child during well visits from 6 months to 5 years
