Product: MassHealth Qualified Health Plans Senior Care Options

Sprinter Health Screenings

In our ongoing effort to improve health outcomes for our members, WellSense will contract Sprinter Health starting in August to perform health screenings to WellSense Senior Care Options members who we've identified as having open care gaps.

These screenings include:

- Diabetes Eye Exam (RetinaVue 700)
- Diabetes Care: Blood Sugar Controlled (Blood draw for HbA1c)
- Diabetes Care: Kidney Disease Monitoring (Blood draw for eGFR; urine collection for uACR)
- Blood Pressure Vitals
- Colorectal Cancer Screening (FIT kit or Cologuard delivery, education and pick up)

If intervention is needed, Sprinter Health will direct members to their primary care physician (PCP) for follow up. Sprinter will also share health screening information with PCPs via fax for continuity of care. Please be sure to add this documentation to members' medical records.

Questions?

For questions about the Sprinter Health screenings, please email QualityDept@wellsense.org.
