

Medication Adherence for Cholesterol – Statins (MAC)

HEDIS Tip Sheet MY 2025

Measure definition	Plans(s)	Quality Program(s)	Collection and Reporting
	Medicare	CMS Star Rating	Part D Prescription Claims: Pharmacy Data

Best practices for quality care

- Provide clear instructions, highlighting benefits and risks of prescribed medications. Clarify the purpose of patients' medications and emphasize the importance of adherence. Confirm patients understand medication instructions.
- Provide written instructions to reinforce education on proper medication usage and guidance on managing potential side effects.
- Use motivational interviewing and goal setting to boost adherence.
- Ensure your office issues timely refills or prescriptions.
- Ask about and address any potential barriers to adherence, such as concerns related to health benefits, side effects, costs or challenges with accessing medications from the pharmacy.
- Suggest tools like pillboxes, medication apps, smartphone alarms or other reminders to ensure timely medication intake. Offer your office's own text reminders for adherence if available.

Quality score improvement tips

- Recommend auto-refill or mail-order options.
- Prescribe 90-day supplies once stable.
- Schedule follow-up visits within 30 days to assess new medication effectiveness.
- Members must use their Part D pharmacy benefit to close the care gap. This measure is reported through Part D claims only.
- Members qualify for the measure on the second medication fill date, but the measurement period begins when the member fills the medication for the first time.

Measure Medications:

These Statins / Statin Combinations are included in the measure		
• Advicor • Altoprev ER • Altoprev • Amlodipine/Atorvastatin • Atorvastatin/COQ10 • Atorvastatin • Caduet • Crestor	• Ezetimibe/Simvastatin • Flolipid • Fluvastatin • Lescol • Lesxol XL • Lipitor • Livalo • Lovastatin	• Mevacor • Pravachol • Pravastatin • Rosuvastatin • Simcor • Simvastatin • Vytorin • Zocor
