

Tips when prescribing prenatal vitamins

New Hampshire Medicaid recipients can receive generic over-the-counter prenatal vitamins – free of charge – with a prescription. Prenatal vitamins are an important factor in helping to ensure that mom and baby are healthy, so remember to write a prescription for them.

Please note: If you need to prescribe a specific brand of prenatal vitamins, make sure to check the [Well Sense Health Plan online over-the-counter medication formulary](#) to find out if they're covered.
